

STEM Scholars

Thank you for your interest in the STEM Scholars Resources Library. Due to the high number of requests from organizations interested in participating in the library, we have created this simple document to help you decide if your resource should be added to the library.

Please read the below carefully:

The STEM Scholars after school program is for high school students from marginalized communities interested in pursuing science, technology, engineering, math (STEM) and environmental justice related activities.

Please review the following questions carefully:

1. Is your resource suited for high school students?
2. Is your resource or program completely free of charge?
3. Does your resource provide a new topic to the Resources Library?
4. Will your resource help a high school student succeed in their academic/personal/professional pursuits?

If you answered “No” to any of the above questions, then your resource is not well-suited for the STEM Scholars.

If you still believe your resource is well suited for the STEM Scholars Resources Library, please fill out this form: https://uic.ca1.qualtrics.com/jfe/form/SV_cvj2GqA2ihHuudE

We will get back to you with any questions, comments, or concerns.
